

S19-921HR On-Site® Heated Retrofit Kit

- Complies with American National Standard Z358.1-2009
- Full, One-Year Warranty

Specifications

Insulated heater jacket thermostatically controls water in weather conditions down to -10°F (-23.3°C). LED indicator lights ensure proper operation of heaters. GREEN means power is ON. AMBER means heaters are in operation. RED means unit has malfunctioned. This will automatically shut the unit off. Pulling front strap down and away from unit activates eyewash. Uses standard 120VAC power cord.

On-Site Heated Retrofit Kit is not rated for outdoor use.

Construction

Yellow insulated jacket made of 200 Denier foam-backed nylon oxford w/clear vinyl pocket for indicator light box. Silicone rubber pad heaters have PSA adhesive backing for ease of installation.

Standard Equipment

Jacket

High-visibility yellow, waterproof insulated jacket made of 200 Denier foam-backed nylon w/clear vinyl pocket. Includes 9' cord.
